CARLOS VINICIUS

Frontend development

ABOUT

Frontend development specialist proficient in **Next.js, React.js, TypeScript, JavaScript (ES6), and Tailwind CSS**. With a strong background in **UX/UI** design, I focus on crafting intuitive and visually compelling digital experiences. Driven by innovation and challenges, I seek opportunities to leverage my skills in dynamic settings, aiming to advance and elevate my career in the tech.

EXPERIENCES AND PROJECTS

SergipeTec, Sergipe
Junior Frontend Developer
October 2023 – Present

Freelancer, Brasil
Frontend Developer
January 2023 - September 2023

Project: **Nights4Films** (Github / Demo)

- Film catalog platform that allows users to create reviews, rate films, and create lists of films to watch later. Additionally, JWT authentication was implemented to ensure security in user routes and fluid animations throughout the platform.

- Technologies: React.JS, Node.JS, Strapi, API RESTful , Postgres, Git e Figma.

Project: **Cats** (Github / Demo)

- The Social Network for Cats allows users to create publications, like content, comment on other users' photos and view statistics from their profiles. Additionally, a real-time chat room was developed so that users can communicate with each other. To ensure the relevance of the content for the community of cat lovers, an image validation system was implemented using Artificial Intelligence with TensorFlow, automating the verification of the presence of felines in the posted images.

- Technologies: React.JS, Node.JS, Headless Wordpress com API RESTful, Git e Figma.

EDUCATION

Tiradentes University

- Bachelor's degree in Computer Science.

Origamid Technology Platform

- Web Design Completo;
- UI Design Avançado;
- UX Design Heurísticas;
- JavaScript Completo ES6;
- React Completo;
- Next.JS.

Udemy

- Real Project with NextJS(13) and Strapi.
